

# Fleet Situation and EV Options Report

## Does Your City or Town Have a Plan For Rapidly Transitioning to EVs?

Replacing your municipality's Internal Combustion Engine (ICE) vehicles with energy-efficient electric alternatives presents an unprecedented opportunity to reduce your carbon footprint and save money. But planning for, funding, and managing the transition quickly and efficiently poses unique challenges.

**The Fleet Situation and Options Report gives you a detailed roadmap for improving the three pillars of a best-in-class municipal fleet.**

**Incentive Support**  
We help our customers find and apply for federal, state, and local incentives. Let us do the work for you!

### Cost Assessment & Saving Opportunities

We review all your vendor data and company policy information to find areas for improvement. Our clients typically are able to save 15%-30% based on our recommendations.

### Operational & Compliance Improvements

We show you where and how you can improve your fleet management operations and ensure your operations are in line with the current compliance standards.

### Emissions Reporting & EV Conversion Opportunities

We compute your current carbon footprint and identify profitable decarbonization opportunities. Our report also includes a list of applicable government reimbursement and incentive programs.

## How We Work

1 We gather all your vehicle data and run it through our optimization software

2 We present you with a detailed Situation and Options Report outlining positive ROI opportunities

3 We help you execute any parts of the plan that you want to move forward with
